

QuickConnect Mop Handles

Range of interchangeable mop handles in different lengths and materials

Contec's QuickConnect handles offer maximum flexibility for cleaning and disinfection in controlled environments. QuickConnect is a cost-effective solution offering a user maximum flexibility.

Invest in one of our interchangeable mop handles, which can be used with all Contec mop head frames. The mop head frames have identical "quick-connect" buttons which enable easy attachment to all sizes and styles of QuickConnect mop handles.

We can offer carbon fibre, stainless steel, anodised aluminum, and fibreglass mop handles in a variety of handle lengths, including telescopic options for reaching high ceilings. The recently launched carbon fibre handles offer a significant weight advantage over the more traditional materials.

Contec's cleanroom mop handles are suitable for autoclaving or sterilisation, are ergonomically friendly, and easy to use. The handles are all autoclavable at 121 °C for 30 minutes.
