Quality without compromise

sempermed® supreme stands for quality and reliability not without reason, it is one of the most frequently used powder free surgical gloves in Europe.

**Easy to don****Optimized comfort****Optimum protection****Skin-friendly**

supreme

Easy to don

Special synthetic inner coating – The lining has a special net-like structure, optimizing contact with the skin and significantly reducing friction when putting on the glove. The surface of the glove leaves a pleasant, velvety feeling on the skin.

Optimized comfort

Developed for operating theatre needs, the fully anatomical shape with curved fingers matches the natural hand posture. The conical cuff fits the wrist anatomically, and the beading ensures a secure border to the gown.

Optimum protection

Due to its resistance, the wall thickness of the sempermed® supreme has been reduced to such a level that your tactile sensitivity is not in the least impaired, while at the same time providing optimum protection. The glove feels like a second skin.

Skin-friendly

The Sempermed post-production process involves an automatic finishing method that intensively washes the gloves multiple times, reducing skin-irritating substances and natural latex proteins to the technically lowest level.

Technical data

Type	sterile surgical glove for single use, powder free, with synthetic inner coating		
Color	natural white		
Size / Overall length as per EN 455-2	5½, 6 and 6½ / 7, 7½ and 8 / 8½ and 9	median 270 mm median 280 mm median 285 mm	
Wall thickness measured in single layer in the palm area	0.19 - 0.23 mm		
Barrier performance	AQL 0.65		
Material	natural rubber latex (NR)		
Glove shape	fully anatomical with curved fingers and rolled rim		
Force at break as per EN 455-2	≥ 12 N, exceeding EN 455-2 (≥ 12 N instead of 9 N)		
Shelf life in original packaging if stored according to product specification	3 years		
Sterilization	radiation STERILE R		
Labeling & conformity to standards	EN 455-1/-2/-3/-4, EN ISO 21420, EN ISO 374-1 (Type B), EN ISO 374-2, EN 16523-1, EN ISO 374-4, ISO 374-5, EN 421, EN 556, ISO 2859-1, ISO 15223-1, ASTM F1671/F1671M		
Purpose	Single-use medical device class IIa according to MD Directive 93/42/EEC Single-use protective glove – PPE category III (protection against chemical substances for limited time)* according to PPE Regulation (EU) 2016/425		

Packaging

- Left and right glove with turned up cuff in inner pouch, ozone-tight, sealed in peel pack.
- In dispenser carton with sterilization indicator: 50 pairs
- In transport carton with sterilization indicator: 300 pairs
