

PROSAT Meltblown Polypropylene Wipes

Presaturated with 70% IPA and 30% deionised water

PROSAT meltblown polypropylene wipes offer exceptional cleanliness suitable for use in a wide variety of critical environments. Saturated with a solution of 70% USP grade isopropanol and 30% deionised water, the wipes provide a uniform and consistent application of the solution to the surface. PROSAT meltblown polypropylene wipes are exceptionally clean and also free from additives of any kind. This particular meltblown polypropylene contains very low levels of sodium and other ions.

Presaturated wipes ensure consistent saturation of each wipe independent of operator. Presaturated wipes can increase solvent control and accountability as well as reduce VOC emissions. The wipes are provided in convenient and easy to use peel and reseal pouches.

Suitable for use in many critical environments, PROSAT meltblown polypropylene wipes are ideal for wiping articles prior to pass through, cleaning process tools and other equipment, general surface cleaning and cleaning prior to decal application.

When used as a disinfectant, the IPA wipes are efficacious against bacteria in 1 min and yeasts in 3 mins. PROSAT meltblown polypropylene wipes are authorised for sale in the EU and United Kingdom under the EU and GB Biocidal Products Regulation.

Features	Benefits
Meltblown polypropylene wipes	Low levels of particles and fibres, and free from additives
Microsized filaments	Provide exceptional particle removal
Presaturated with 70% IPA and 30% DI water	- Convenient and easy to use, reduces VOC's - Controlled saturation levels and effective, fast-drying disinfection
Resealable pouch	- Easy to quickly remove wipes from pouch - Maintains saturation levels throughout use
Available validated sterile	Suitable for use in Grade A zones
