

PROSAT Meltblown Polypropylene Wipes

Presaturated with 70% Denatured Ethanol and DI Water

Contec's PROSAT Polypropylene wipes are presaturated with 70% denatured ethanol and 30% deionized water. The meltblown polypropylene wipes provide a consistent release of solvent to thoroughly remove surface contaminants in critical environments.

PROSAT Meltblown Polypropylene wipes are exceptionally clean and also free from additives of any kind. This particular meltblown polypropylene contains very low levels of sodium and other ions. PROSAT Sterile MBPP wipes are validated sterile and compatible with Grade A/B or ISO Class 5-8 environments.

PROSAT meltblown polypropylene wipes are ideal for wiping articles prior to pass through, cleaning process tools and other equipment and general surface cleaning.

Presaturated wipes ensure consistent saturation of each wipe independent of operator. Presaturated wipes can increase solvent control and accountability as well as reduce VOC emissions. The wipes are provided in convenient and easy to use peel and reseal pouches.
