supreme plus

Easy to don

The special net-like lining structure optimizes the contact surface between the film and the skin, thus considerably reducing the friction resistance when putting on the glove. The result: The sempermed® supreme plus facilitates easy donning of the gloves.

Skin-friendly

The specially developed, automatic finishing process contains intensive and multiple washing steps. Skin-irritating substances resulting from the production process and the natural latex protein concentration are thus reduced to the technically lowest level.

Secure grip

This surgical glove offers enhanced grip for better instrument handling, thanks to its micro-rough surface and offline chlorination process.
